NUVAUX

Nylon Carpet Tile Flooring System

NUVAUX

DISCOVER
THE BENEFITS OF
CARPET

Comfort and Aesthetics

Carpet adds a touch of warmth and comfort to commercial spaces, making them feel more inviting and comfortable for employees, clients, or visitors. Additionally, carpet comes in a wide range of colors, patterns, and textures, allowing businesses to create a visually appealing environment that aligns with their branding or design preferences.

Noise Reduction

In busy commercial environments, such as offices, hotels, or retail spaces, noise can be a significant issue. Carpet helps absorb sound, reducing echoes and minimizing noise levels, creating a quieter and more productive atmosphere for work or relaxation.

Safety and Slip Resistance

Carpet provides a soft and cushioned surface that can help prevent slips and falls, making it a safer option for high-traffic areas, especially when compared to hard flooring surfaces like tile or hardwood.

Durability and Maintenance

Commercial-grade carpet tiles are designed to withstand heavy foot traffic and frequent use, making them a durable flooring option for busy areas. Additionally, carpet tiles are easy to clean and maintain, with many options offering stain-resistant properties, making them well-suited for commercial settings where cleanliness and hygiene are paramount.
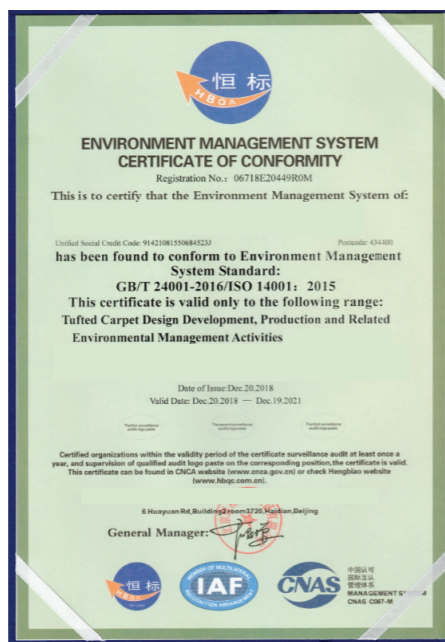

Customization and Flexibility

Carpet tiles offer versatility and customization options, allowing businesses to create unique patterns or designs to suit their specific needs or branding requirements. Additionally, carpet tiles are modular, making it easy to replace damaged or worn tiles without having to replace the entire carpet, reducing maintenance costs and downtime.

Test Report

GREEN LABEL PLUS

INDOOR AIR QUALITY TESTING PROGRAM
THIS CERTIFIES THAT

HAS MET THE REQUIREMENTS OF THE CARPET AND RUG INSTITUTE'S
GREEN LABEL PLUS PROGRAM FOR CATEGORY:

17X Pre-dyed Nylon with PVC Backing

Private Office Range of Total VOCs:
0.5 mg/m³ or less

School Classroom Range of Total VOCs:
0.5 mg/m³ or less

Product Type: Modular Tile

Certification Date: July 21, 2021
Expiration Date: December 29, 2022

CARPET STYLE

When purchasing carpet, understanding carpet styles is crucial alongside carpet types. While carpet type pertains to manufacturing method and structure (e.g., woven, tufted), carpet style refers to pile shape.

Consider traffic levels and maintenance ease when selecting from various carpet styles. This guide to different styles can aid in finding the ideal carpet for your home or office.

Berber

Featuring a level loop or cut pile, Berber carpets boast thicker yarns for enhanced durability. Mimicking the appearance of wool, they're ideal for informal areas, hiding footprints and vacuum tracks.

Multi Level Loop
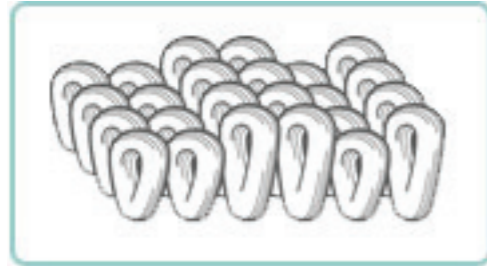

Featuring loops of varying heights, this style offers a uniquely textured surface, making it ideal for busy rooms where durability is key.

Level Loop
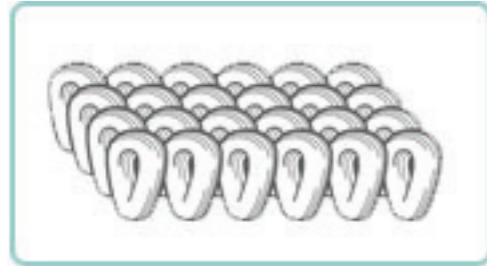

This style involves looped threads of yarn at uniform heights, woven into the backing. Known for durability and resistance to tracking, it's suitable for high-traffic residential and commercial areas.

Cut Loop
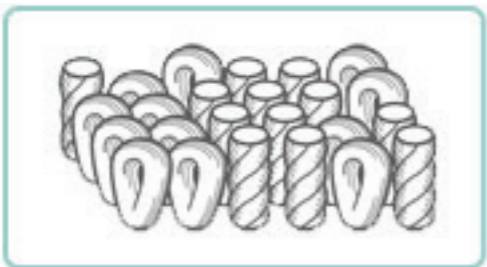

Combining both cut and uncut tips, this style offers a range of surface textures and medium durability, making it perfect for informal spaces.

Plush/ Velvet

Characterized by its smooth, flawless appearance and elegant look, plush/velvet carpets offer lightly twisted fibers for uniform color and a luxurious, soft feel. Ideal for formal areas seeking a touch of sophistication.

Saxony
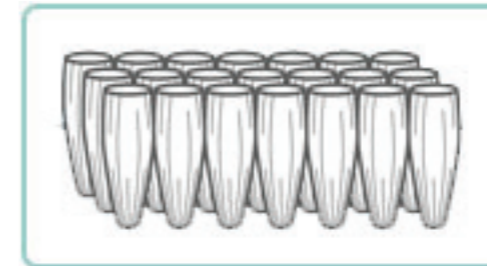

Known for its dense, straight-cut piles, Saxony carpets exude luxury and softness, making them suitable for formal rooms like living and dining areas.

Frieze
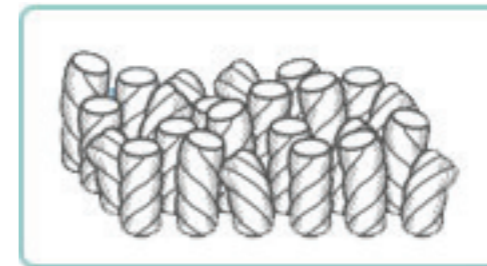

Featuring twisted or curled tufts that create a textured surface, frieze carpets effectively conceal footprints. With short fibers that curl in different directions, they're a practical choice for high-traffic areas like stairs or children's rooms.
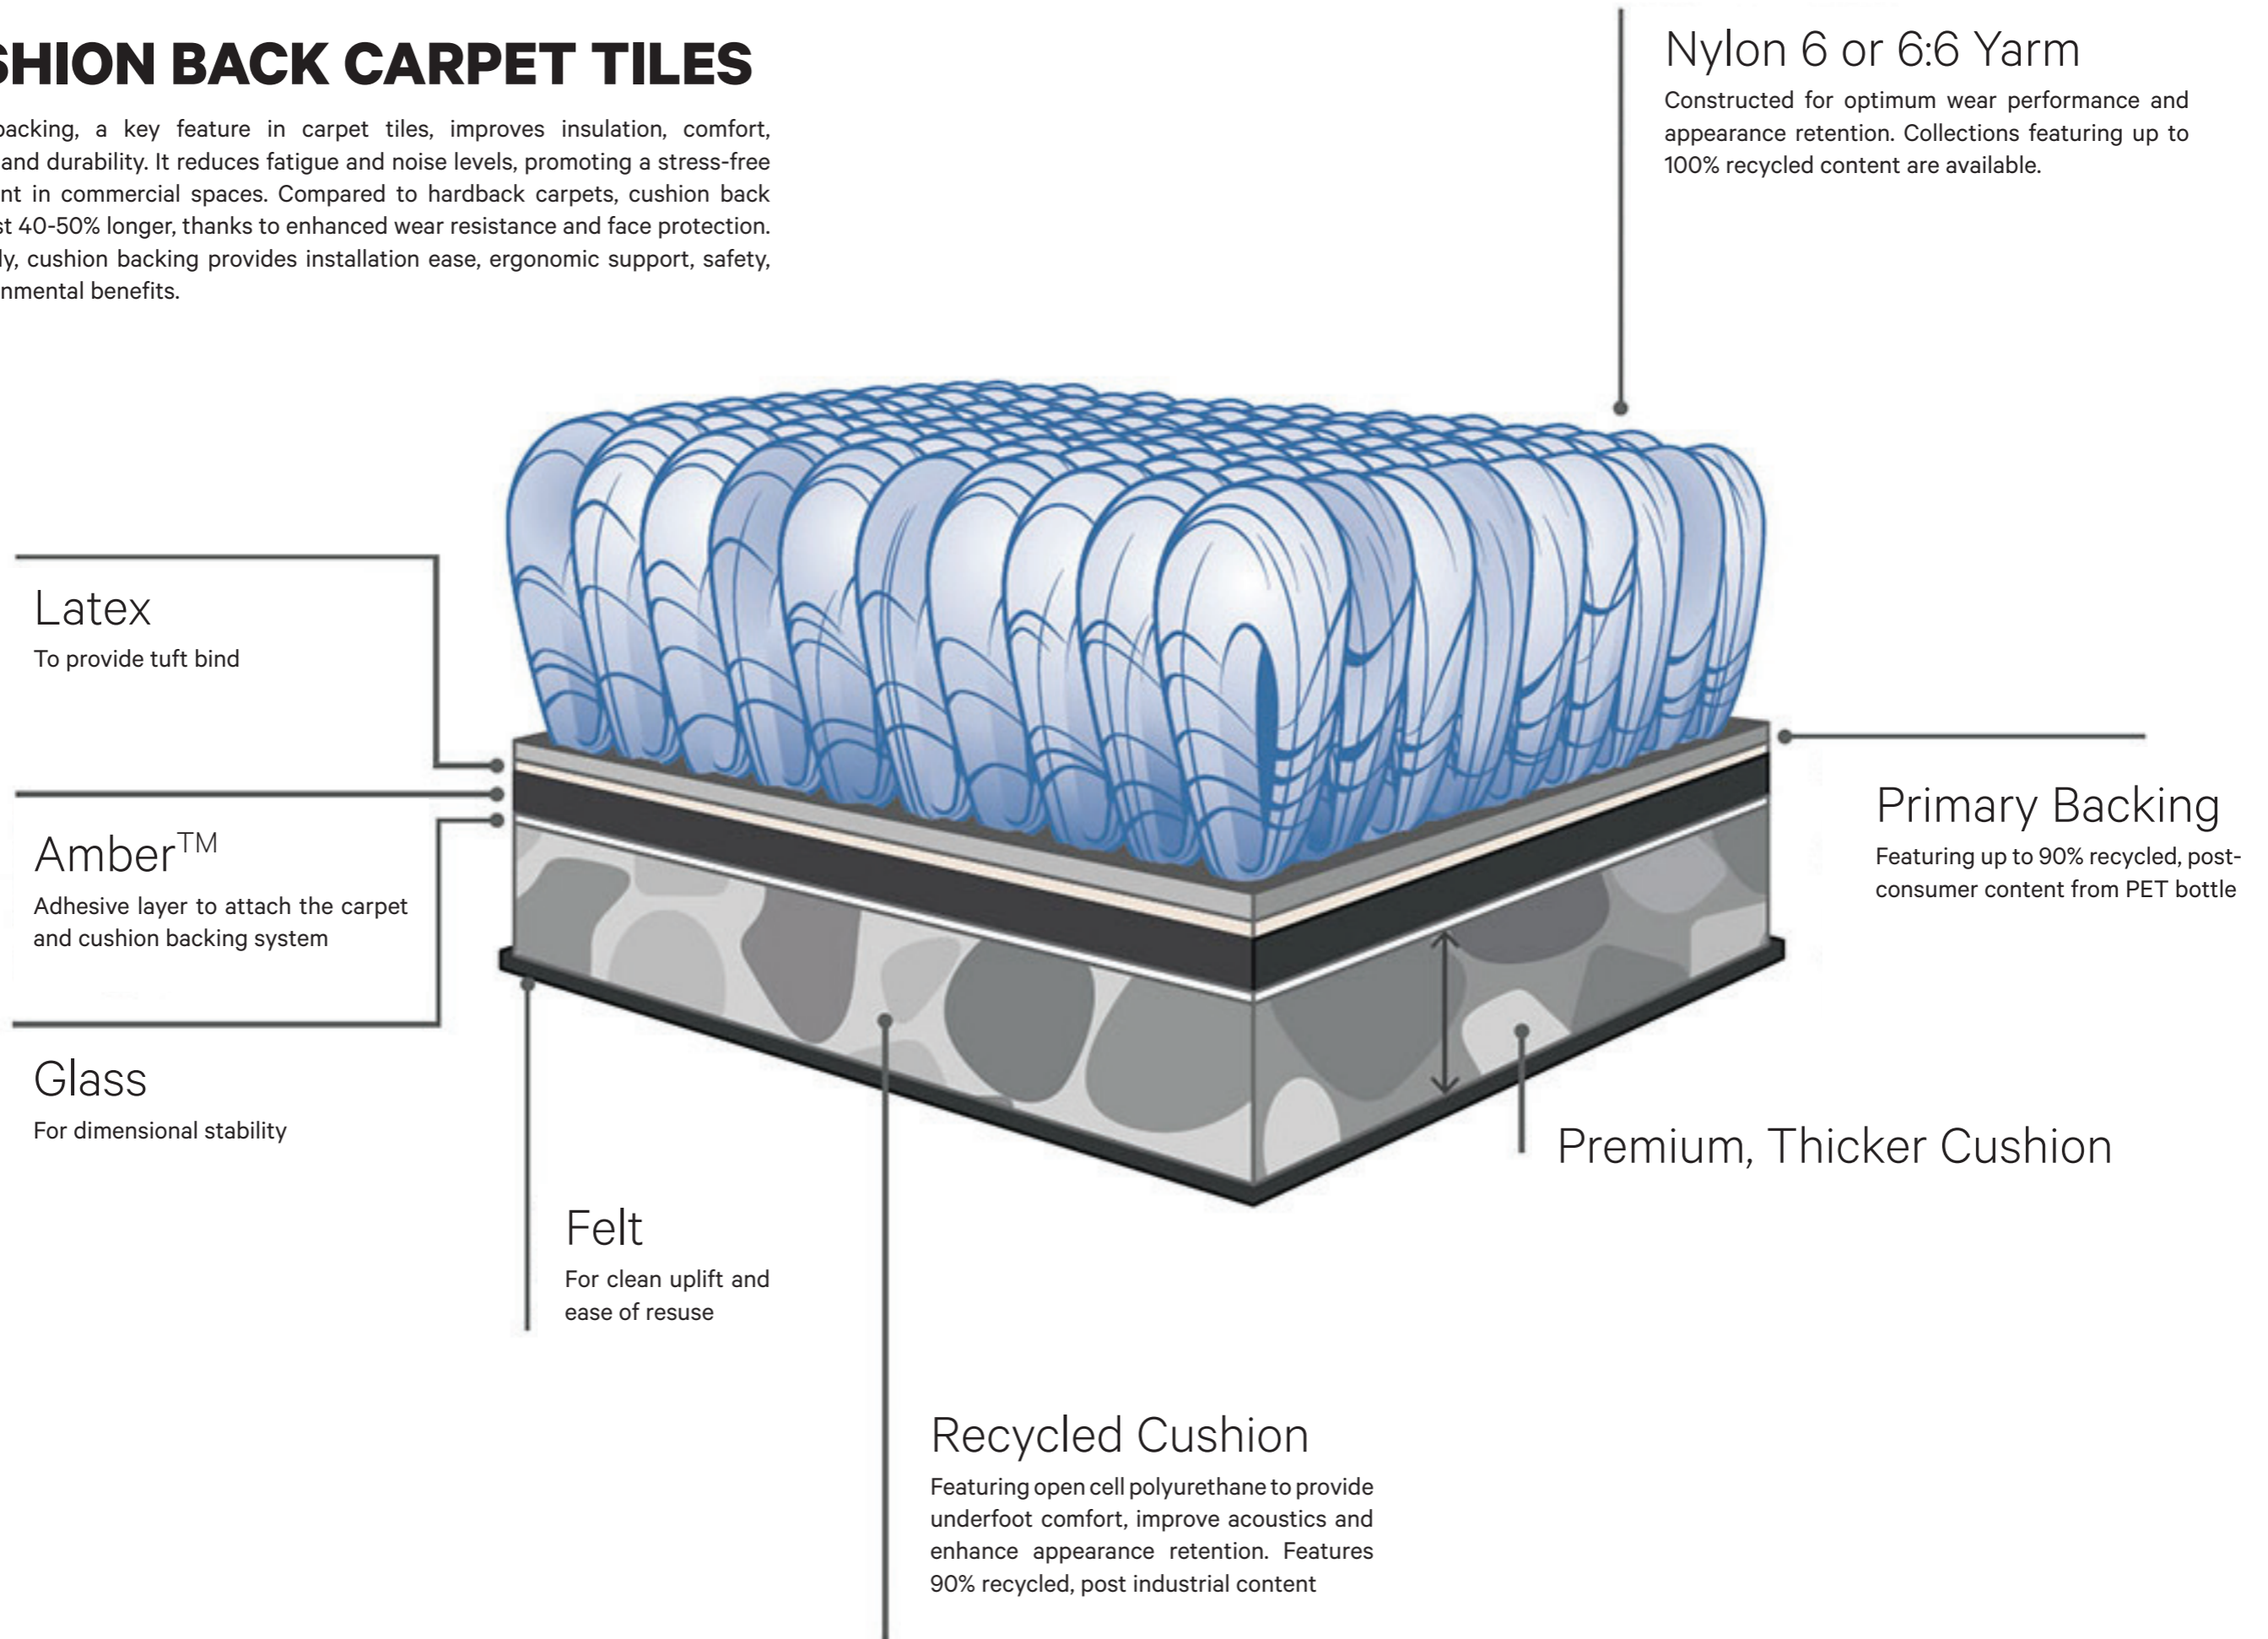

Random Shear
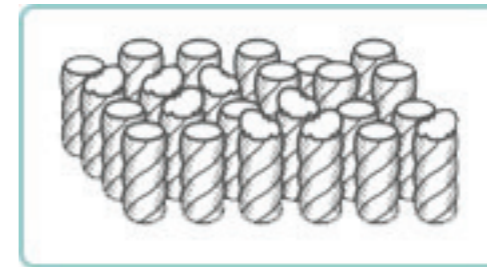

Also known as tip shear, this style blends cut and uncut tips to create a textured appearance suitable for both formal and informal environments.

CUSHION BACK CARPET TILES

Cushion backing, a key feature in carpet tiles, improves insulation, comfort, acoustics, and durability. It reduces fatigue and noise levels, promoting a stress-free environment in commercial spaces. Compared to hardback carpets, cushion back carpets last 40-50% longer, thanks to enhanced wear resistance and face protection. Additionally, cushion backing provides installation ease, ergonomic support, safety, and environmental benefits.

Nylon 6 or 6:6 Yarn
Constructed for optimum wear performance and appearance retention. Collections featuring up to 100% recycled content are available.

Latex
To provide tuft bind

Amber™
Adhesive layer to attach the carpet and cushion backing system

Glass
For dimensional stability

Primary Backing
Featuring up to 90% recycled, post-consumer content from PET bottle

Premium, Thicker Cushion

Felt
For clean uplift and ease of resuse

Recycled Cushion
Featuring open cell polyurethane to provide underfoot comfort, improve acoustics and enhance appearance retention. Features 90% recycled, post industrial content

Landscape series

Construction:
Level Loop

Face Fiber:
Nylon

Backing Material:
PVC

Gauge:
